

Estimation Of Business Expenses

Estimation Of Business Expenses

This report delves into the captivating realm of India's agricultural cultivation, providing a comprehensive visual exploration of key aspects and trends in the agricultural sector. Through the visual representations, readers can gain valuable insights into crop production, seasonal variations, regional distribution, and overall production trends. These visualizations enable intuitive analysis, allowing stakeholders to uncover patterns, identify areas of growth or concern, and make data-driven decisions.

Introduction:

This Document delivers what we have done in this project and what we experienced by this project. Here we attached the step by step procedure we followed to complete this project successfully. Also we attached the links of our project for reference .

1. Creating Empathy Map:

- By observing the topic of this project **Estimation Of Business Expenses** first me and my teammates discuss about the topic.
- With the help of **Mural** application we create an “**Empathy Map**”.
- We express our **Ideas, Thoughts, Does, Feel** in the form of mappings.

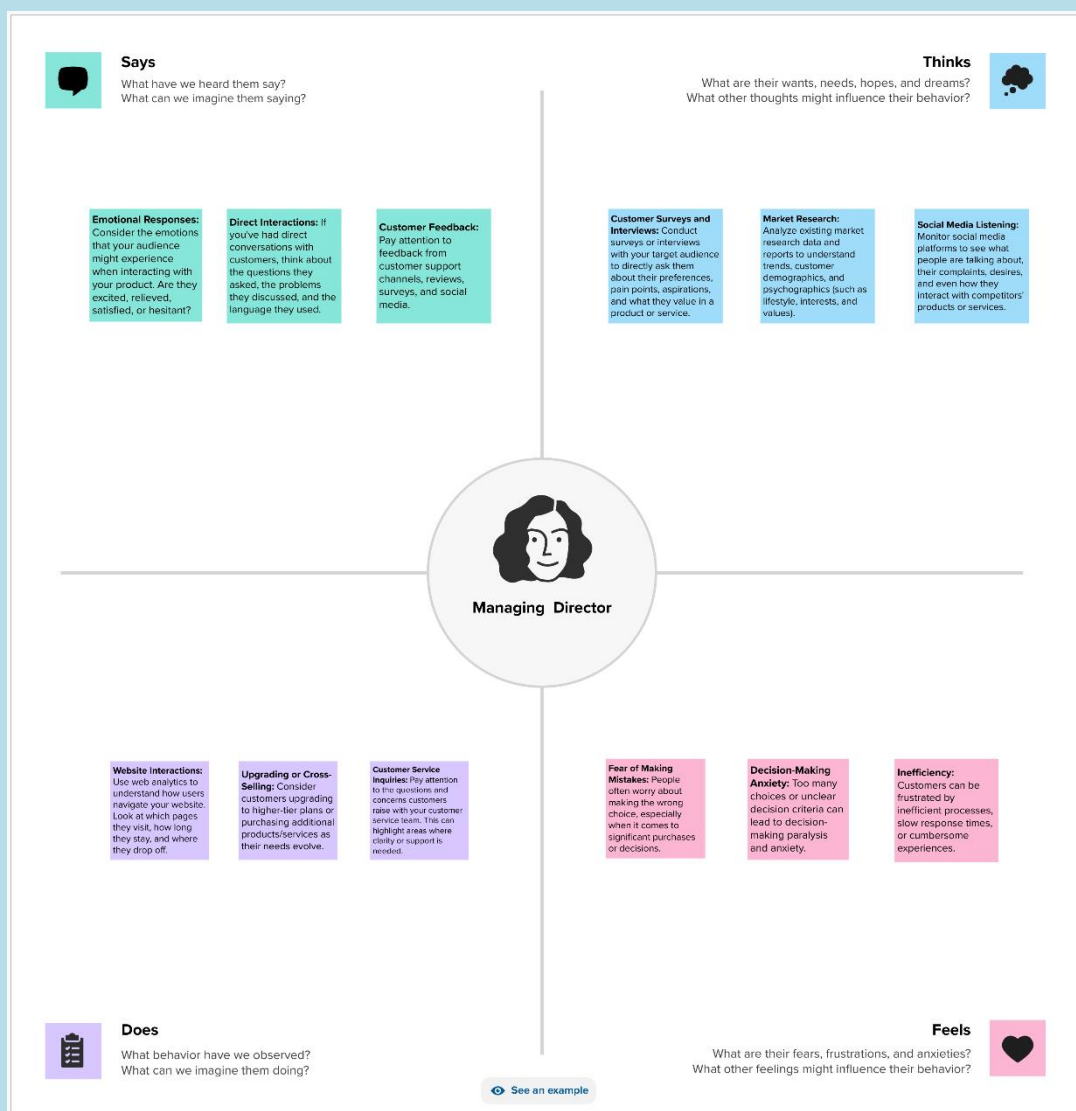

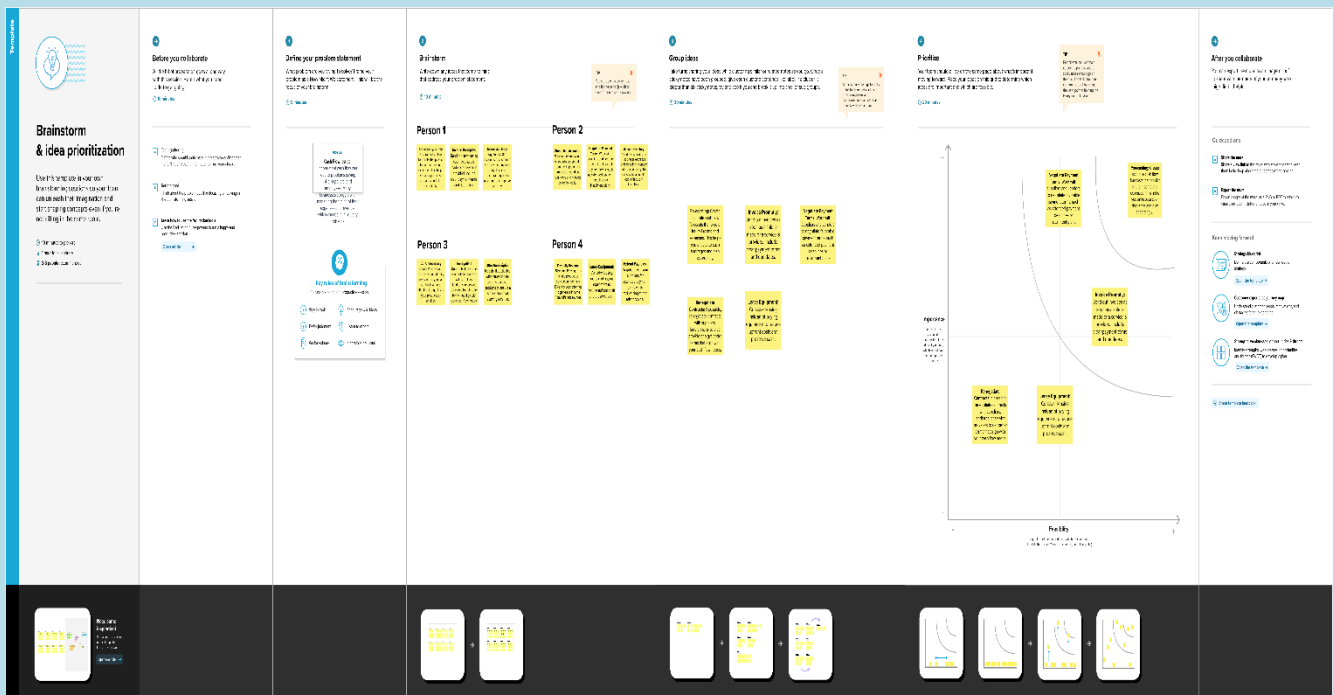

Fig 1: Empathy Map

2. Creating Brainstorm:

- With the help of **Mural** application we create a “**Brainstorm**” .
- In this Activity me and my teammates discuss the solution for the given problem statement.
- The important points are highlighted and ranked based by its effectiveness.

4. Downloading the dataset

We download the required data set from the given link

Understand the data

Data consists of 33 rows which correspond to 33 different business types and 29 columns that correspond to different operating expenses.

5. Data Visualization:

Activity 1: No of Unique Visualizations

The number of unique visualizations that can be created with a given dataset. Some common types of visualizations that can be used to analyze the performance and efficiency of banks include bar charts, line charts, heat maps, scatter plots, pie charts, Maps etc.

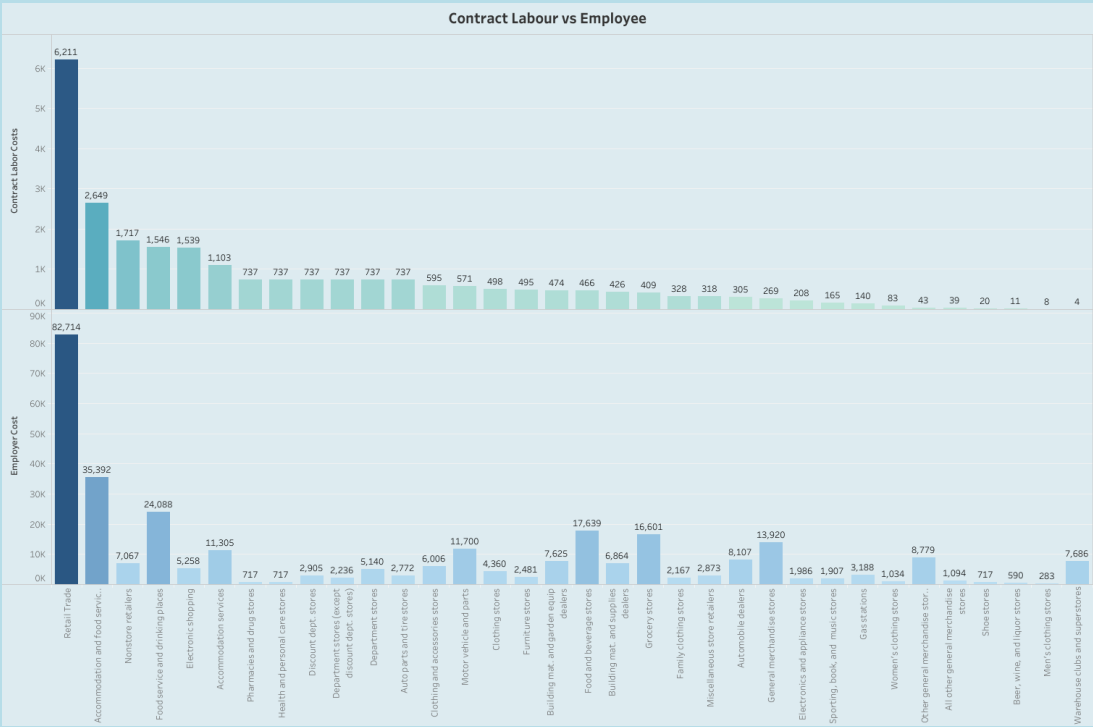

Activity 1.1 : Annual Pay Roll

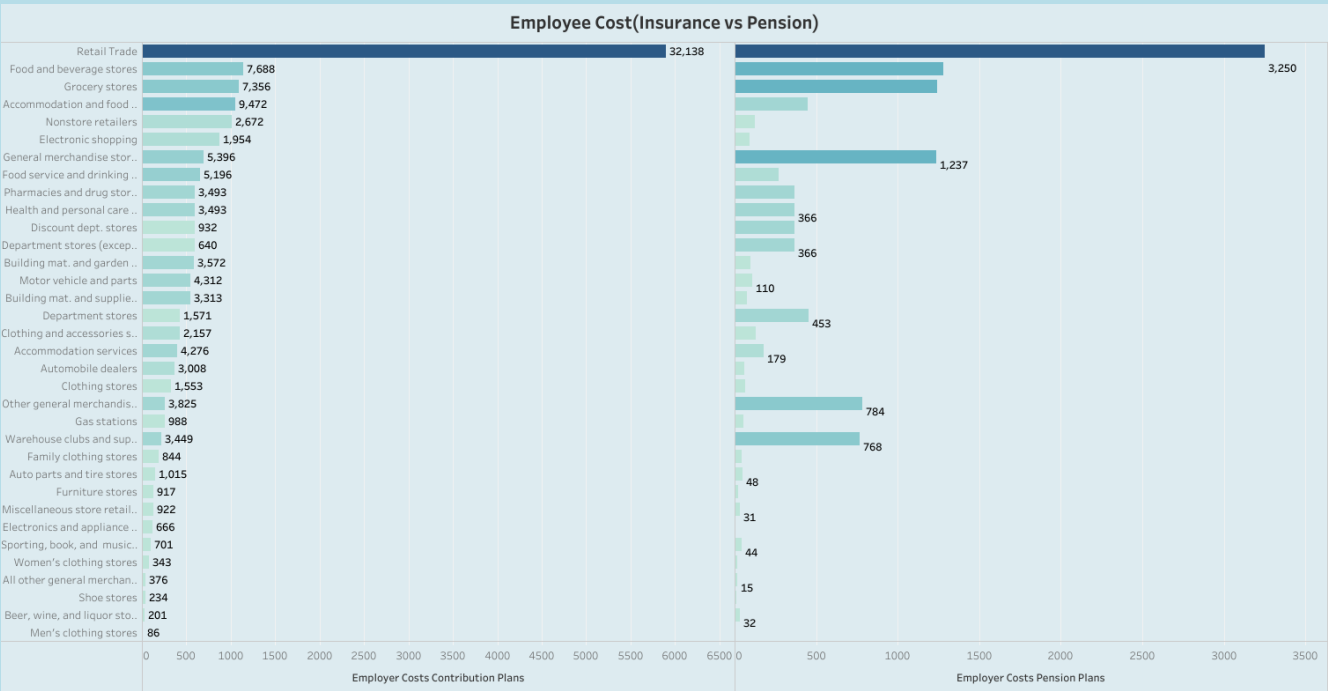

Activity 1.2 : Advertisement Cost

Activity 1.3 : Contract Labour vs Employee

Activity 1.4 : Employee Cost(Insurance vs Pension)

Activity 1.5 : Equipment Costs

Activity 1.6 : Expenses Yoy

Activity 1.7 : Fuel

Activity 1.8 : Maintenance of Buildings

Activity 1.9 : Power Expenditure

Activity 1.10 : Rental Payment For Machinery

Rental Payment For Machinery										
Retail Trade 3,461	Accommodation and food services 1,710	Clothing and accessories stores 171	Grocery stores 344	Pharmacies and drug stores 375			Gas			
	Food and beverage stores 413	Motor vehicle and parts 337	General merchandise stores 236	Family clothing stores	Building mat. and supplies	Shoe stores 15				
	Food service and drinking places 1,028	Clothing stores 119	Health and personal care stores 375	Automobile dealers 228	Nonstore retailers 488	Warehouse clubs and	All other	Auto		
						Electronic shopping				
					Sporting, book, and music stores					

Activity 1.11 : Taxes And Licenses

Activity 1.12 : Transportation and Warehousing

6. Dashboard:

A dashboard is a graphical user interface (GUI) that displays information and data in an organized, easy-to-read format. Dashboards are often used to provide real-time monitoring and analysis of data and are typically designed for a specific purpose or use case. Dashboards can be used in a variety of settings, such as business, finance, manufacturing, healthcare, and many other industries. They can be used to track key performance indicators (KPIs), monitor performance metrics, and display data in the form of charts, graphs, and tables.

Activity 1: Responsive and Design of dashboard

Once you have created views on different sheets in Tableau, we pull them to into a dashboard.

Activity 1.1 : Dashboard 1

Activity 1.2 : Dashboard 2

Activity 1.3 : Dashboard 3

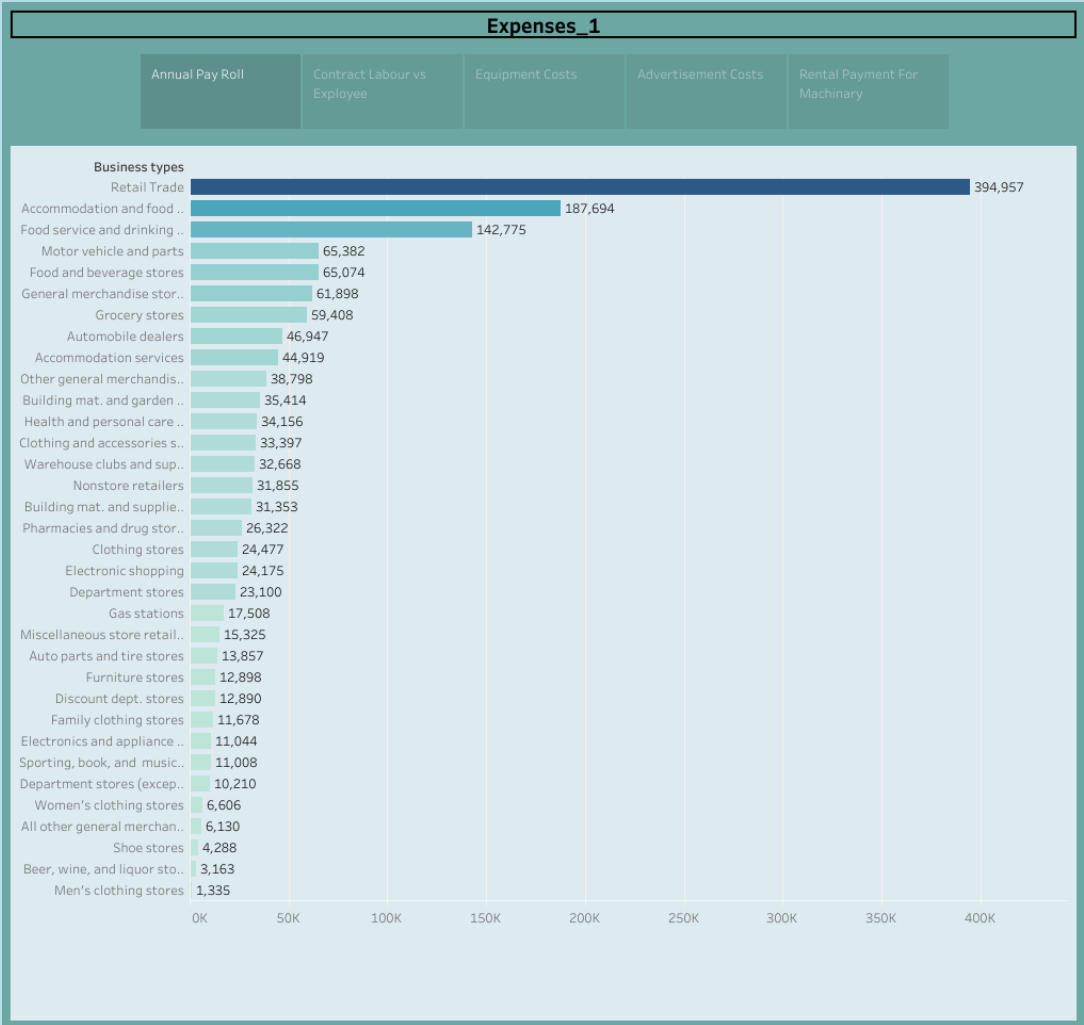

7. Story:

A data story is a way of presenting data and analysis in a narrative format, intending to make the information more engaging and easier to understand. A data story typically includes a clear introduction that sets the stage and explains the context for the data, a body that presents the data and analysis logically and systematically, and a conclusion that summarizes the key findings and highlights their implications.

Activity 1: Number of scenes in a story

A storyboard is a visual representation of the data analysis process and it breaks down the analysis into a series of steps or scenes.

Activity 1.1 : Story 1

Activity 1.2 : Story 2

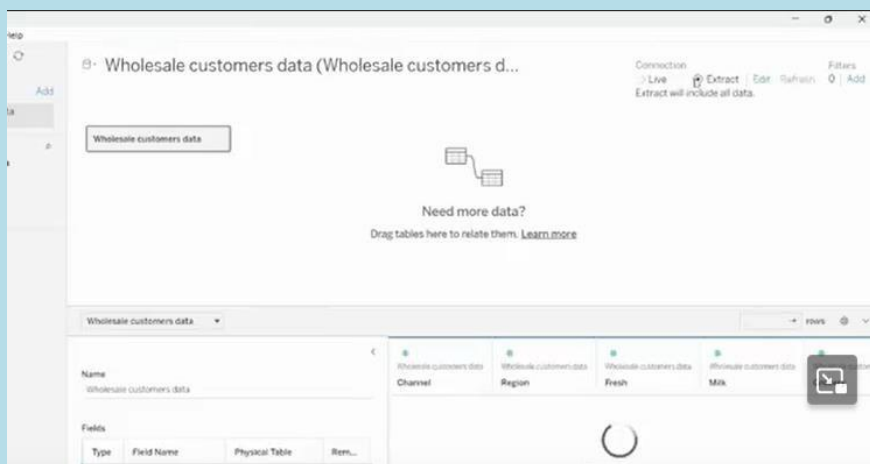

8. Publishing:

Publishing helps us to track and monitor key performance metrics and to communicate results and progress. help a publisher stay informed, make better decisions, and communicate their performance to others.

Publishing dashboard and reports to tableau public

Step 1 Go to data Source and Select Extract so that .hyper extension files are created and save it at your desktop.
(please wait for pop up of file to save)

Step 2: Go to Dashboard/story, click on share button on the top ribbon

Share via Tableau Server or Tableau Cloud

Server:

Quick Connect
[Tableau Cloud](#)

Don't have a Tableau Server or Tableau Cloud account? Quickly create a Tableau Cloud site to share your work.

Give the server address of your tableau public account and click on connect.

Sign in to <https://public.tableau.com>

Sign In

☐ Remember me

[FORGOT PASSWORD](#) | [CREATE AN ACCOUNT](#)

You can now **access all of Tableau and Tableau Public** with **a single user account.**

Sign in to your Tableau Public account or create a new account if you don't have one. You can visit the Tableau Public website (public.tableau.com) and click on the "Sign In" or "Join" button.

In the "Tableau Public Sign In" window, enter your Tableau Public account credentials and click "Sign In."

Next, you'll need to provide a title and description for your workbook. Fill in the appropriate details in the provided field of workbook Title

Click on the "Save" button to start the publishing process. Tableau Desktop will upload your workbook to Tableau Public.

Once the upload is complete, a browser window will automatically open, displaying your published workbook on Tableau Public. Review the workbook to ensure that everything appears as expected.

So in Similar way we can also publish Story to tableau public.
